

# KROMEKOTE FOLDING BOARD

NOVEMBER 2007

## PRODUCT FEATURES

- A true "cast coated" paper triple coated for superior smoothness, gloss and minimal dot gain.
- Its brighter blue-white shade will enhance your printed piece providing crisp, clear images for maximum contrast.
- Exceptional high-speed runnability and quick drying time saves money and production time on press.
- Improved stiffness provides a more rigid feel to our sheet.
- Uncoated backside is suitable for line art and one color printing.
- Kromekote Folding Board can be printed utilizing the latest printing processes (i.e. – high resolution, direct-to-plate, Stochastic, waterless, etc.) allowing full application of image reproduction technology.
- Improved coating allows for flexibility and limits cracking and dusting.
- Kromekote Folding Board is available with recycled content or a coated backside on a manufacturing basis.
- Stocked in a variety of basis weights and sizes.
- Kromekote Folding Board is suited for a wide range of projects including:
  - Business Cards
  - CD Packaging
  - Folding Cartons
  - Hang Tags
  - Press/Media Kits
  - Annual Report Covers (14 pt)
  - Postcards (14 pt)
